Index to Subjects—Volume 24, 1992

Current Microbiology

© Springer-Verlag New York Inc. 1992

Acinetobacter lwoffi, inorganic phosphate transport in, 275
Actinobacillus pleuropneumoniae hemolysin protein, effect on cultured porcine neutrophils, 81
Aeromonas infections, role of rRNA gene restriction patterns in epidemiological investigation of, 15
Agrobacterium tumefaciens, role of polyamines in growth of, 269
Alkaline serine protease, effect of effectors of sporulation in *B. subtilis* on production of, 129
α-amylase mRNA, of *B. amyloliquefaciens*, functional half-life of, 125
Amphotericin B, flow cytofluorometric susceptibility test (FCST) synergy testing of, 171
Anabaena variabilis ATCC 29413, siderophores produced by, 241
Anaerobic halophilic saccharolytic bacteria, methanethiol utilization and sulfur reduction by, 247
Aniline degradation, in *Pseudomonas* sp. strain CIT1, molecular cloning and pathway for, 303
Animal protein kinases, bacterial inhibitor of, 207
Atomic force microscopy, topography of hydrated bacterial biofilm on copper surface studied by, 223
ATP pool, copper uptake by cyanobacterium and decline in, 35

Bacillus amyloliquefaciens, functional half-life of α-amylase mRNA of, 125
Bacillus megaterium, effect of temperature on translation of mRNA coding of metalloproteinase of, 337
Bacillus subtilis 168, alkaline serine protease production, bacilysin formation, and sporulation in, 129
Bacillus subtilis mutant, DnaK homologue protein of, 143
Bacilysin, effect of effectors of sporulation in *B. subtilis* on formation of, 129
Bacterial strains, struvite precipitation by, 343
Bacteriophage gy1, effect of RNaseIII in *E. coli* on efficiency of, 63
Bacteriophage RZ1, of *Rhodobacter sphaeroides*, isolation and characterization of, 151
Bacterium-like organism (BLO), of citrus greening disease, detection of, 89
Bacteroides fragilis, synthesis and release of proteases by, 55
Bacteroides ruminicola cryptic plasmid pRRI2, construction of shuttle vector based on, 49
(1,3)-β-glucan synthase, from *S. cerevisiae*, activation of, 295
β-lactoglobulin, activation of (1,3)-β-glucan synthase of *S. cerevisiae* by, 295
Biofilm, atomic force microscopy examination of, 223
Bradyrhizobium, biosynthesis of cyclic beta-1,6 -1,3 glucans of, 101
Bradyrhizobium japonicum, constitutive and nitrate-induced, membrane-bound nitrate reductase from, 121
Brain-heart infusion agar, production and detection of skin permeability factors in *Yersinia ruckeri* using, 263
Brij-35, activation of (1,3)-β-glucan synthase of *S. cerevisiae* by, 295
Buchnera aphidicola, PCR and oligonucleotide primer studies of, 23
Butyrivibrio fibriosolvens AR10, cryptic plasmid pBf1 from, 193

Campylobacter jejuni TGH9011, cloning and sequence analysis of flagellin gene of, 213
Candida albicans, modulation of amphotericin B fungicidal effects on, 171
Cellophane plate method, production and detection of skin permeability factors in *Yersinia ruckeri* using, 263
Chlamydial inclusions, accumulation of intermediate filament epitope-bearing fibers in, 329
Chloramphenicol, effect on half-life of α-amylase mRNA of *B. amyloliquefaciens*, 125
Chromosomal DNA, electroporation of *H. influenzae* with, 97
Ciprofloxacin, in *Staphylococcus aureus* rat granuloma pouch model, antibacterial activity of, 349
Citrus greening disease, use of DNA probes for detection of, 89
Conidiation, in phytopathogenic fungi, inhibited by *Pseudomonas cepacia*, 181
Copper surface, role of bacterium CCI#8 in corrosion of, 223
Cowpea *Rhizobium*, isolation and characterization of siderophore from, 137
Cryptococcus neoformans, modulation of amphotericin B fungicidal effects on, 171
Cyclic beta-1,2-glucans, of *Rhizobium*, analogs of cyclic beta-1,6 -1,3 glucans of *Bradyrhizobium*, 101
Cyclic beta-1,6 -1,3 glucans, of *Bradyrhizobium*, biosynthesis of, 101

Difference spectra, low-temperature, study of filamentous bacteria *Streptomyces clavuligerus* and *Saccharopolyspora erythraea* by, 105
DNA probe, detection of bacterium-like organism of citrus greening disease by, 89
DNA repair, induced by nonmutagenic stress in *E. coli*, 251
DnaK homologue protein, of *E. coli*, study of *Bacillus subtilis* mutant lacking, 143

Electroporation
  transformation of *Bacillus reuteri* by, 199
  transformation of *Haemophilus influenzae* following, 97
Epidemiological investigations, role of rRNA gene restriction patterns of *Aeromonas* spp. for, 15
Erythromycin resistance plasmid pLUL631, study of electroporation transformation of *Lactobacillus reuteri* using, 199
Escherichia coli
  cellular extracts of, as inhibitor of animal protein kinases, 207
  efficiency of bacteriophage gy1 propagation in, 63
  induction of error-free DNA repair by nonmutangeic stress in, 251, 257
  phosphorylated $NADP^+$-specific dehydrogenase from, 73
  relationship between prokaryotic endosymbiont *Buchnera aphidicola* and, 23
Escherichia coli:*Bacteroides* shuttle vector pRRI207, development based on *B. ruminicola* plasmid replicon pRRI2, 49
Ethyl methanesulfonate, lethality and mutagenicity in halophilic archaebacteria caused by, 41

Flagellin gene, of *Campylobacter jejuni*, cloning and sequence analysis of, 213
Flow cytofluorometric susceptibility test (FCST), synergy testing of amphotericin B by, 171

Fumonisin, effect of sphingolipid production in *Pichia* (*Hansenula*) *ciferri*, 319

Glutamate dehydrogenase, phosphorylated NADP$^+$-specific, from *E. coli*, 73
Glycolipids, of virulent and avirulent strain membranes of *Mycoplasma hyopneumoniae*, 189
Glycoproteins, of virulent and avirulent strain membranes of *Mycoplasma hyopneumoniae*, 189
Greening disease, use of DNA probes for detection of several strains of, 89

Haemophilus influenzae, transformation by electroporation with plasmid and chromosomal DNA, 97
Halobacteria, ethyl methanesulfonate mutagenesis of, 41
Halobacteroides strains, methanethiol as sulfur source for growth of, 247
Haloferax gibbonsii, isolation of auxotrophic mutants of, 41
Haloferax mediterranei, isolation of auxotrophic mutants of, 41
Heat shock, effect on protein synthesis in *Lactococcus lactis* subsp. *lactis*, 281
Helicobacter pylori lipopolysaccharides, extraction and biochemical analyses of, 165
Hemolysin protein, of *Actinobacillus pleuropneumoniae*, effect on cultured porcine neutrophils, 81
3-Hydroxyhexadecanoic acid, in lipopolysaccharide of *Helicobacter pylori*, 165
3-Hydroxyoctadecanoic acid, in lipopolysaccharide of *Helicobacter pylori*, 165

Inorganic transport system, in *Acinetobacter lwoffi*, 275
Intermediate filament epitope, accumulation in chlamydial inclusions, 329

Klebsiella pneumoniae, physicochemical surface properties of, 31

Lactobacillus reuteri, electroporation used in transformation of, 199
Lactococcin production, in *Lactococcus lactis* subsp. *lactis* 484, 231
Lactococcus lactis subsp. 484, lactococcin production in, 231
Lactococcus lactis subsp. *lactis*, heat shock-induced synthesis in, 281
Lipopolysaccharide
  effect on cultured porcine neutrophils, 81
  of *Helicobacter pylori*, extraction and biochemical analyses of, 165

Marine shipworm bacterium, isolation and characterization of alkaline protease from, 111
Metalloproteinase, of *Bacillus megaterium*, effect of temperature on translation of mRNA coding of, 337
Methanethiol, anaerobic halophilic saccharolytic bacteria use of, 247
Methanogenic bacteria, plasmid DNA from, 285
Microbead method, cell-free extracts from pathogenic mycobacteria obtained by, 311
mRNA coding, in *Bacillus megaterium*, effect of temperature on translation of, 337
Mycoplasma hyopneumoniae, glycoprotein and glycolipid composition of virulent and avirulent strain membranes of, 189

N-acetyldihydrosphingosine, effect of fumonisin on *Pichia* (*Hansenula*) *ciferri* production of, 319
N-acetylphytosphingosine, effect of fumonisin on *Pichia* (*Hansenula*) *ciferri* production of, 319
Nitrate reductase, from *Bradyrhizobium japonicum* cell membrane, 121
Nonmutagenic stress
  effect on UV resistance of *E. coli*, lack of additivity of, 257
  induction of error-free DNA repair in *E. coli* by, 251
Nostoc calcicola Bréb, effect of copper uptake in, 35

Octadecanoic acid, in lipopolysaccharide of *Helicobacter pylori*, 165
Ornithine decarboxylase activity, reduction of polyamine levels in *Agrobacterium tumefaciens* and inhibition of, 269

Palmitoylation, of membrane proteins in *Spiroplasma floricola*, 67
Pathogenic mycobacteria, rapid microbead method used to obtain cell-free extracts from, 311
Penicillin-binding proteins, in *Streptococcus mitis*, 289
Permeability factors, in extracellular products of *Yersinia ruckeri*, 263
Phosphorylated NADP$^+$-specific glutamate dehydrogenase, from *E. coli*, 73
Photoaffinity labeling, of enriched microsomal fractions with 5-azido-UDP-Glc and 8-azido-GTP, 295
Photochemical reactions, effect of copper uptake in cyanobacterium on, 35
Phytopathogenic fungi, *P. cepacia* causes mycelial deformities and inhibition of conidiation in, 181
Phytosphingosine, effect of fumonisin on *Pichia* (*Hansenula*) *ciferri* production of, 319
Pichia (*Hansenula*) *ciferri*, effect of fumonisin on sphingolipid production from, 319
Piromyces mae, morpholigical, cytological, and ultrastructural characterization of, 159
Plasmid DNA, from methanogenic bacteria, 285
Plasmid pBf1, use as replicon for recombinant plasmids, 193
Plasmid pT3, physical map of, 285
Plasmid, role in lactococcin production in *Lactococcus lactis* subsp. *lactis* 484, 231
Polyamines, role in growth of *Agrobacterium tumefaciens*, 269
Polymerase chain reaction, study of DNA fragments of *Buchnera aphidicola* endosymbiont using, 23
Porcine neutrophils, effect of *Actinobacillus pleuropneumoniae* hemolysin and lipopolysaccharide on, 81
Potentiometric titrations, study of filamentous bacteria *Streptomyces clavuligerus* and *Saccharopolyspora erythraea* by, 105
Protease
  from marine shipworm bacterium, isolation and characterization of, 111
  synthesis and release by *Bacteroides fragilis*, 55
Protein F, of *P. aeruginosa*, as vaccine against chronic pulmonary infection, 1
Protein synthesis, heat shock-induced in *Lactococcus lactis* subsp. *lactis*, 281
Pseudomonas aeruginosa
  intranasal immunization with temperature-sensitive mutants of *P. aeruginosa* protects against pulmonary challenge from, 9
  opsonophagocytic-killing of strains of, 1
Pseudomonas cepacia, inhibition of conidiation in phytopathogenic fungi by, 181
Pseudomonas sp. strain CIT1, molecular cloning and characterization of pathway for aniline degradation in, 303
Pulmonary infection
  recombinant outer membrane protein F of *P. aeruginosa* as vaccine against, 1
  temperature-sensitive mutants of *P. aeruginosa* as protection against, 9
Putrescine, role of ornithine decarboxylase activity in *Agrobacterium tumefaciens* in biosynthesis of, 269

Rat granuloma pouch model, study of antibacterial activity of rufloxacin and ciprofloxacin using, 349
Recombinant plasmids use of cryptic plasmid pBf1 from *Butyrivibrio fibrisolvens* AR10 as a replicon for, 193
Rhizobium, cyclic beta-1,2-glucans of, 101
Rhodobacter sphaeroides, isolation and characterization of recombination-defective bacteriophage of, 151
Ribonuclease III, effect on efficiency of bacteriophage gy1 propagation in *E. coli*, 63
Rifampicin, effect on half-life of α-amylase mRNA of *B. amyloliquefaciens*, 125
rRNA gene restriction patterns, of *Aeromonas* spp., for epidemiological investigations, 15
Rufloxacin, in *Staphylococcus aureus* rat granuloma pouch model, antibacterial activity of, 349
Rumen fungus, anaerobic, characterization of, 159

Saccharomyces cerevisiae, activation of (1,3)-β-glucan synthase from, 295
Saccharopolyspora erythraea, cytochromes of, 105
Salt-sensitive mutants, of moderately halophilic eubacterium, 325
SDS-PAGE analysis, of cell-free extracts obtained by rapid microbead method, 311
Siderophore
  from cowpea *Rhizobium* (peanut isolate), isolation and characterization of, 137
  produced by cyanobacteria, isolation and purification of, 241
Spiroplasma floricola, palmitoylation of membrane proteins in, 67
Sporulation, effect on alkaline serine protease production and bacilysin formation in *B. subtilis*, 129
Staphylococcus aureus-induced infections, protective effects of rufloxacin and ciprofloxacin against, 349
Streptococcus mitis, penicillin-binding proteins in, 289
Streptomyces clavuligerus, cytochromes of, 105
Struvite precipitation, by soil and fresh water bacteria, 343
Sulfur reduction, by anaerobic halophilic saccharolytic bacteria, 247
Synechococcus sp. PCC 7942, siderophores produced by, 241

Temperature-sensitive mutants, of *P. aeruginosa*, as protection against lethal pulmonary challenge, 9

Ultraviolet radiation, effect of nonmutagenic stresses on *E. coli* resistance to, 251, 257

Vibrio costicola, isolation of salt-sensitive mutants of, 325

Western blot analysis, of cell-free extracts obtained by rapid microbead method, 311

Yersinia ruckeri, skin permeability factors in extracellular products of, 263
